AUG 2021
PRESENT

SKYWIND GROUP

React & React Native Developer

- Organizing a two-month summer internship course of a team of five sixteen-year-old high schoolers, teaching them the basics of HTML, CSS and JavaScript and finished with a React Native messaging app that I designed, managed and reviewed.
- Successfully deployed three big NextJS projects to multiple markets and a few npm libraries that connected the projects to various content delivery systems.
- Worked with Jenkins for deployments and Prismic CMS for custom app-specific content and features.
- Maintaining while updated and added features to an existing React Native application, bringing it from a 65% crash-free analytic to a 99.6% one.
- Worked in a front-end team of 7 international developers, made code-reviews and introduced new employees to the projects that we worked on.
- Hosted interviews and reviews, client and technical project discussions, managed the team when in need.

COGNIZANT SOFTVISION

React Native Developer

APR 2021
AUG 2021

- Contributed to an internal application with AR/VR furniture in React Native.
- Learned GraphQL and integrated it into an existing application.
- Hosted a few community presentations regarding GraphQL and Deep Linking.
- Added code testing using JEST to an existing project.
- Worked with a big and well-organized React Native community.

SPRYBASE

React & React Native Developer

JUN 2019
APR 2021

- Completed a React Native application as a one-man front-end team that has 10 000 weekly users and 4.9 stars on both App Store and Play Store.
- Deployed 3 applications written in React and React Native that were connected with sockets and that had an interconnected use-case.
- Developed CI/CD pipelines for React and React Native projects using fastlane.
- Delivered multiple small React projects with support for old browsers.
- Worked on a renting management application with deprecated dependencies.
- Learned GIT, clean code, requests, sockets and data management, got accustomed to React and React Native.
